

# Abhay Gaur

-  **Software Developer.**
-  **Problem solver.**
-  **Open source contributor.**
-  **Basketball Hooper.**
-  **Cafe-hopper? Always!**

Believes in contributing back to the society.

## Mission

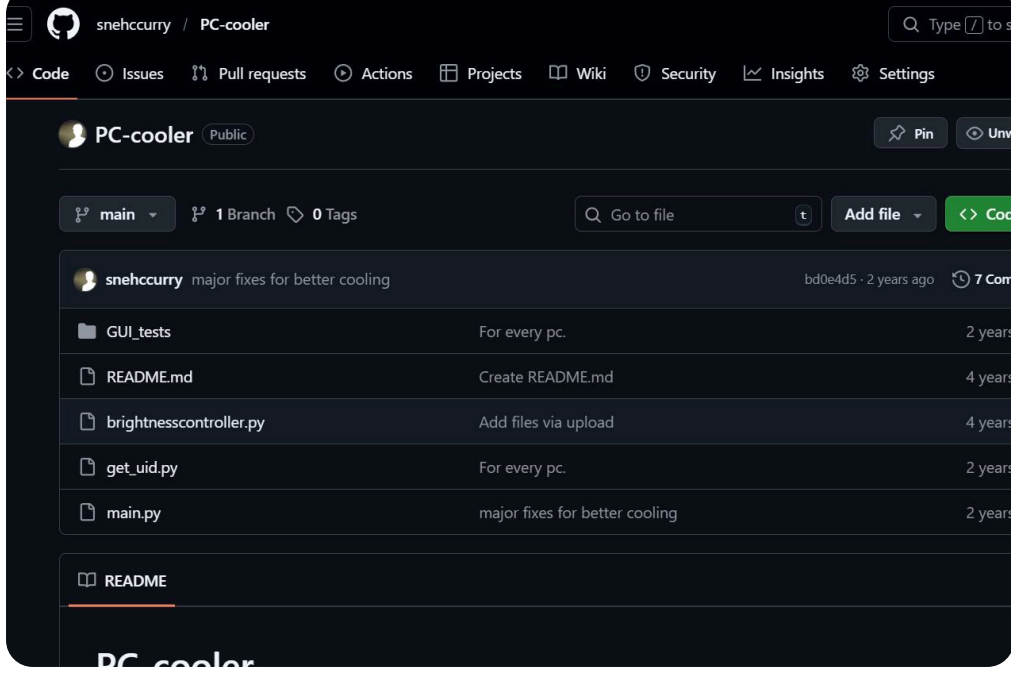

**Building** scalable solutions that solve real problems, empower people, create opportunity, & improve lives globally.

## PROJECTS

### Heema

#### A GUI LIBRARY

A modern GUI **library** for Tkinter, with support for modern UI elements, scrollable frames and new set of buttons that can be used to make beautiful apps faster than before that not only look great but perform too.

### PC-Cooler

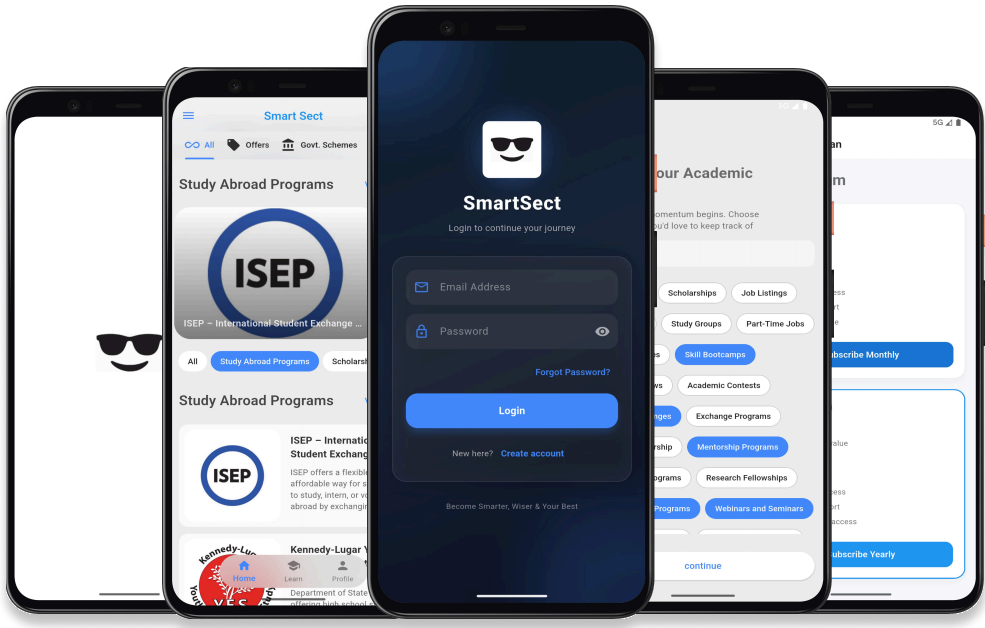

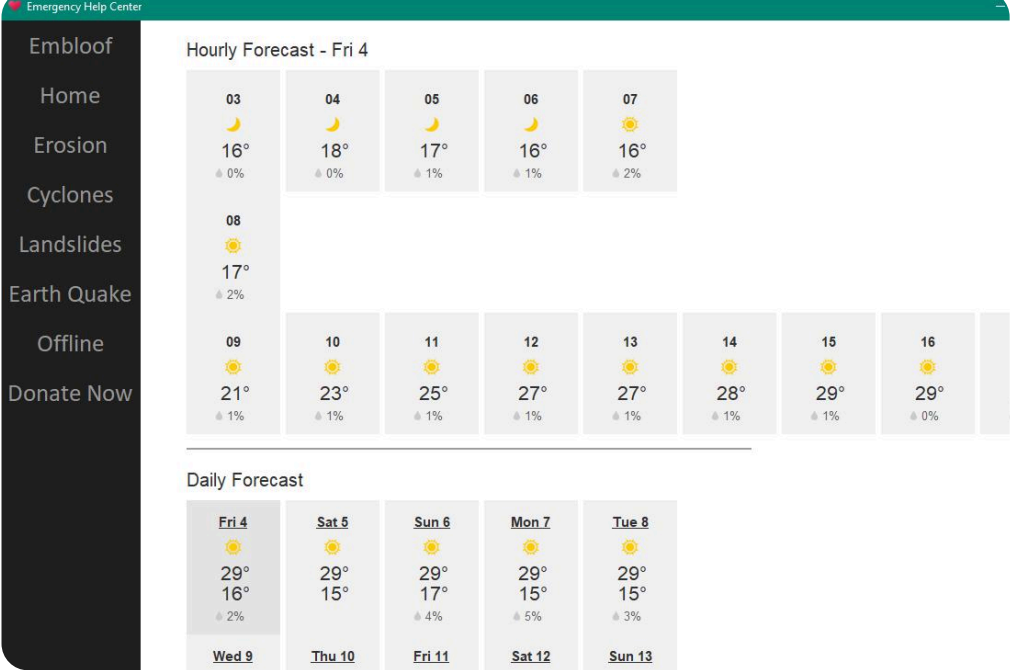

#### INTEL CPU OVERHEATING FIX

A Software that keeps your laptop cool by fixing the way how your cpu operates, by turning the cpu clock speed up and down thereby **solving overheating**.

### VhelpResque

#### EMERGENCY OFFLINE APP

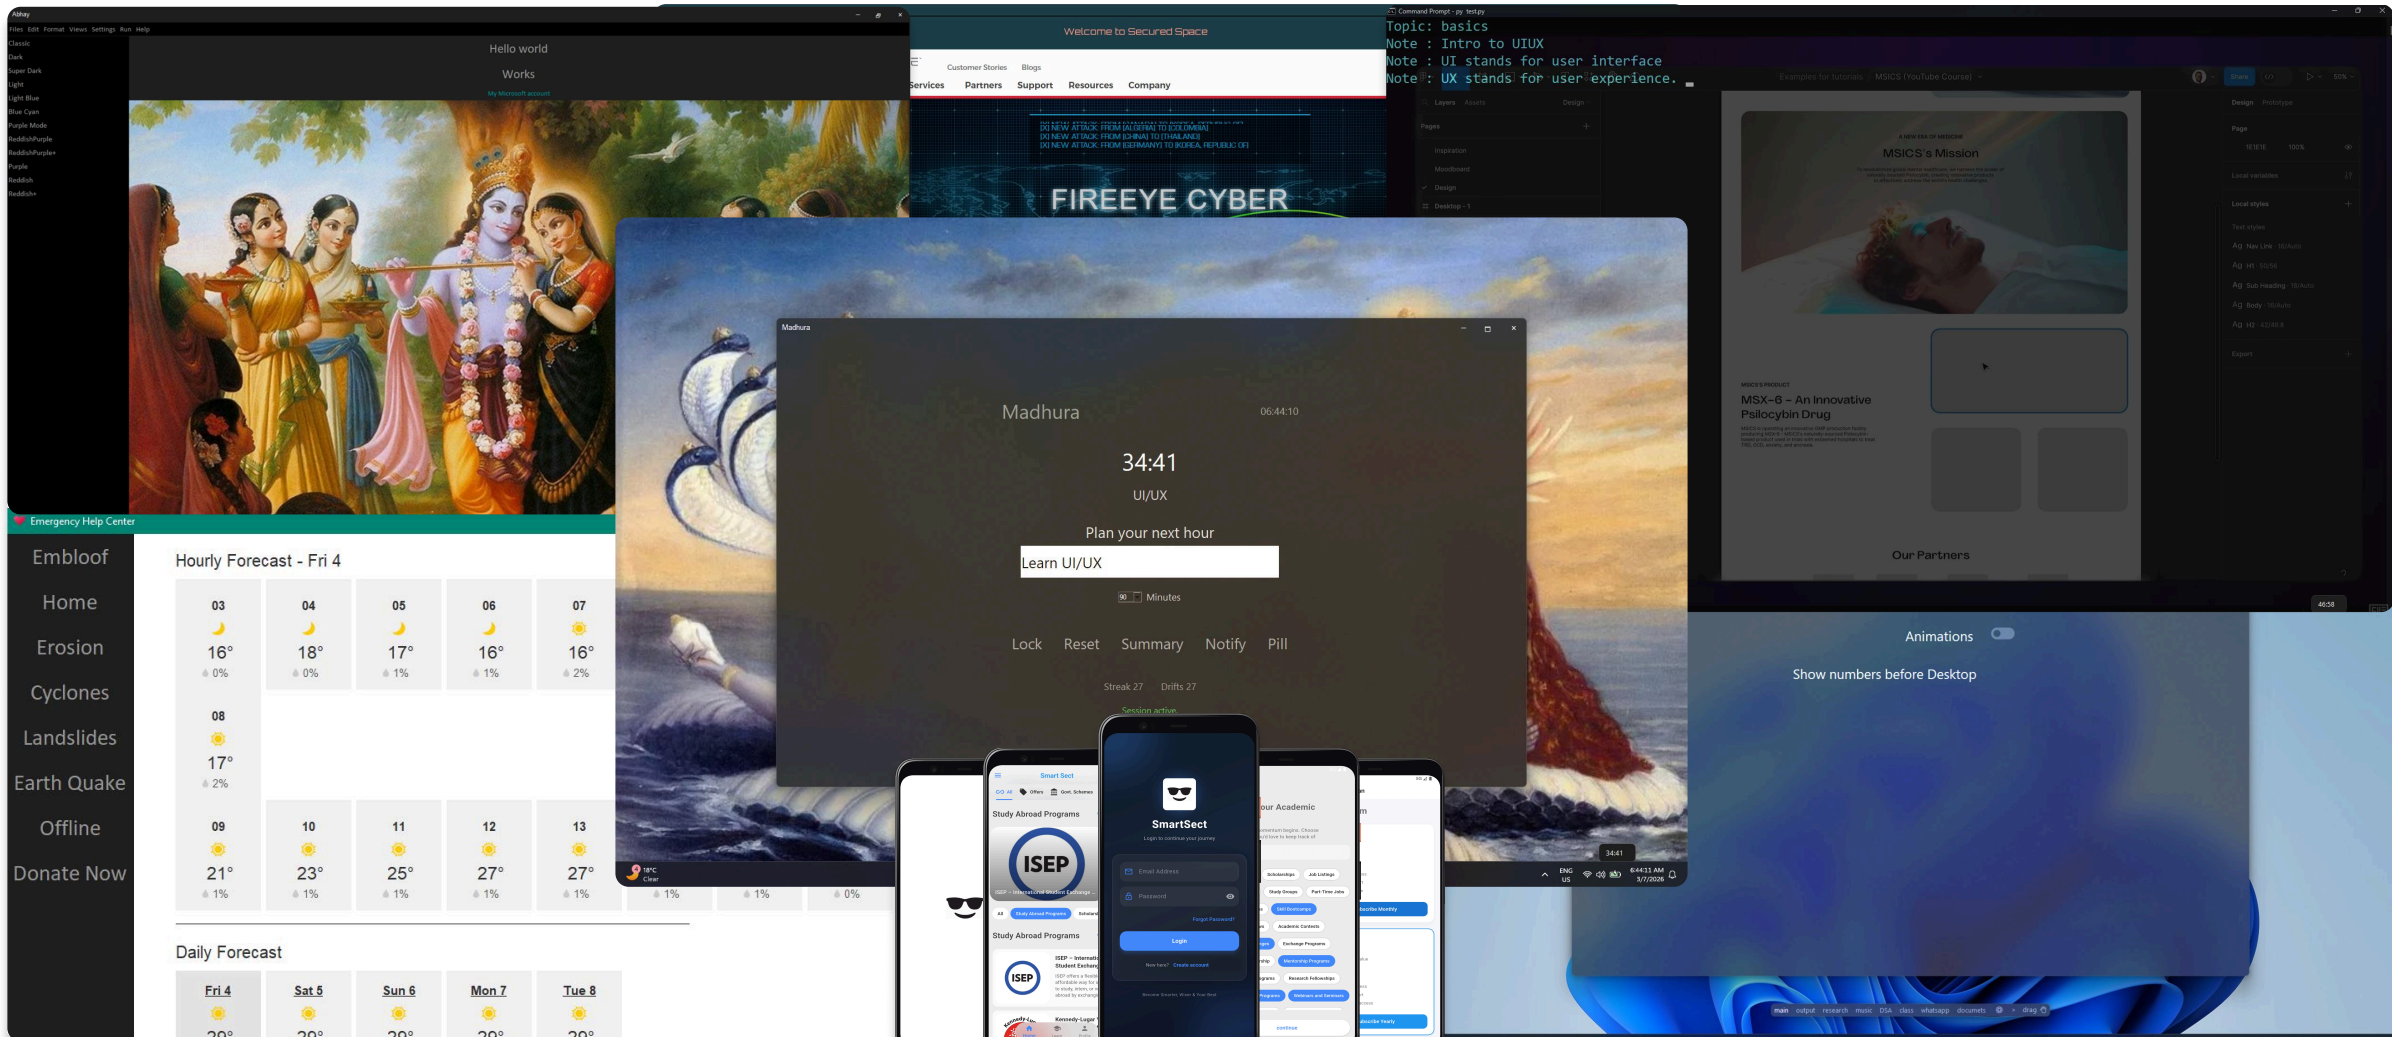

An **emergency app** that you can use during a natural disaster or a war like situation that is loaded with instructions as to what to do during the event of a war or a natural disaster, helping people with emergency situations.

### SmartSect

#### APP FOR STUDENTS

An **opportunities app** for students where they don't have to look out for opportunities, opportunities come to them, be it job opportunities, scholarships, Govt schemes, discounts, competitions, events, etc. Helping students with opportunities before they missed them.

**20+ apps built** since 2021
